COMPANY INTRODUCTION

'No.1 Roofing & Building Supplies' is a family owned company that first opened its doors after recognising a gap in the market for a customer focussed business that services the needs of metal roofing contractors.

Two decades on and the business is today one of the largest wholesale suppliers of steel, corrugated iron and metal roofing products in Sydney, supplying the largest range of Colorbond®, Zinalume® & International roofing systems, as well as its associated custom steel roofing products and almost any building product on the market.

The business is strategically spread over ten locations, offering the best possible service in the market place.

Snap-Line 45° x 345mm Windspray®

Snap-Line 45° x 345mm Windspray®

Snap-Line 45°

With a 45mm deep, thin rib Snap-Line 45° has Standard cover widths of 305mm, 345mm and 445mm. To offer even more flexibility, these can be varied from 305 mm to 610mm.

Choose from various materials such as Colorbond®, Zinalume®, Zinc, Copper, Aluminium, Stainless Steel, Corten and the Uni-Cote® Lux Range. This gives the designer and architect many options when looking to achieve the desired aesthetics for their roofing and walling project.

Extensively tested and certified by an independent engineer in accordance to AS1562.1-1992,

Snap-Line 45° is a structural, self supporting profile that does not require continuous backing *. It is the strongest architectural profile in the market. Performance Test Data available upon request.

*Softer metals such as Zinc and Copper will require continuous substrate backing under the sheet.

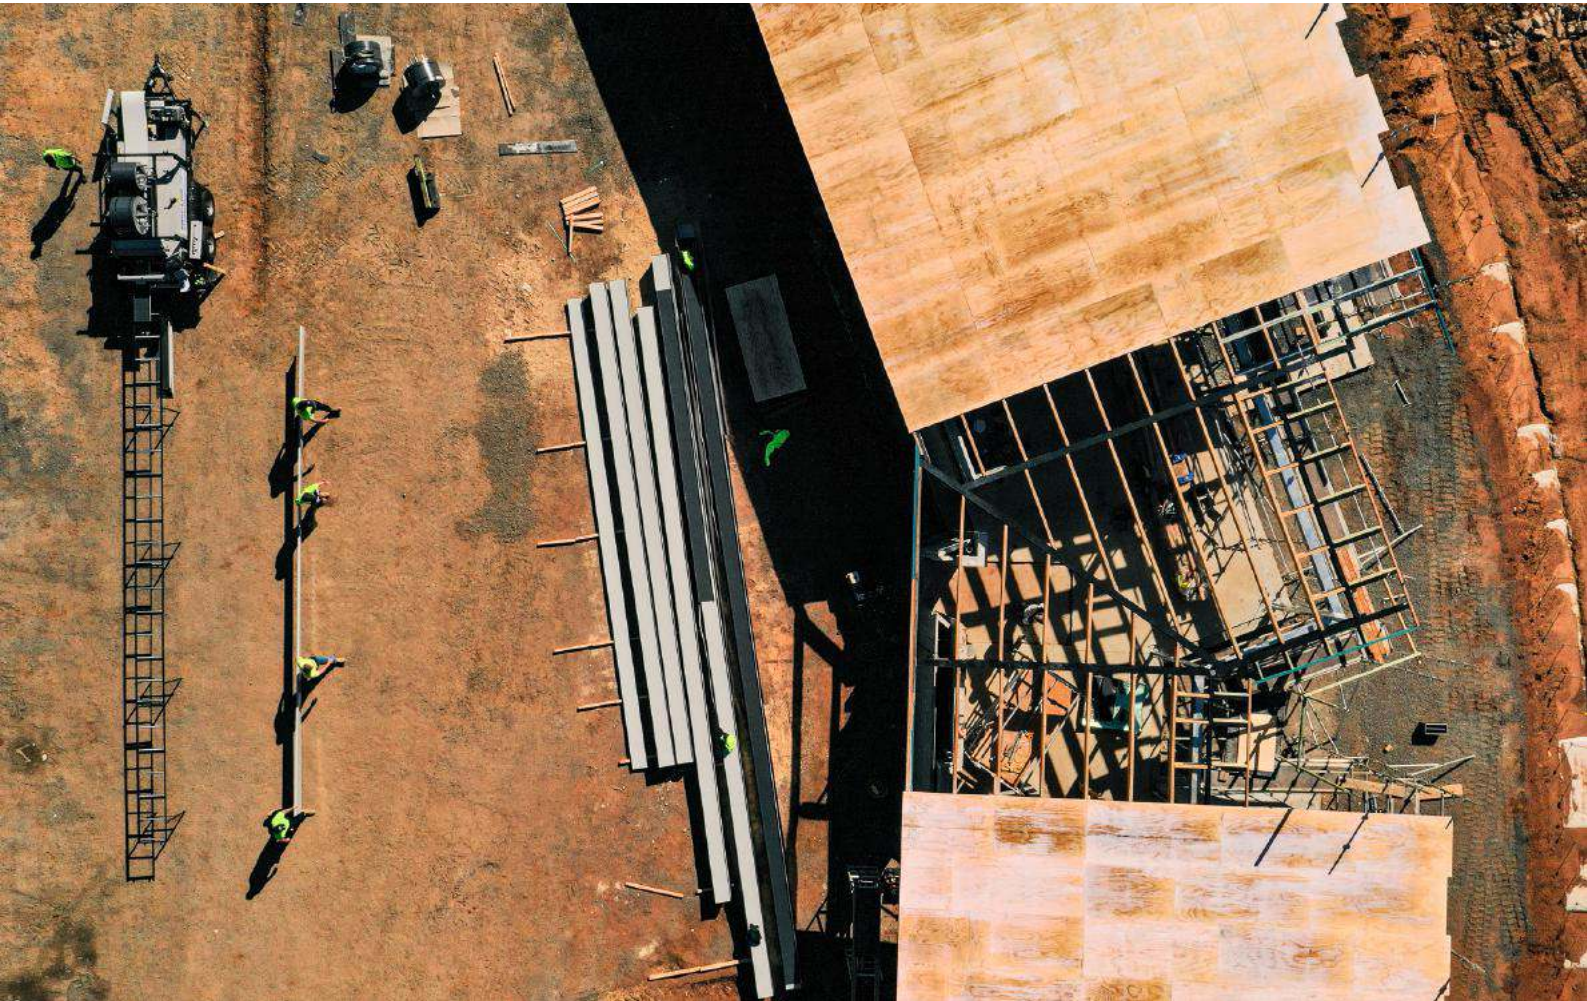

- **Engineered & certified**
- **Variable cover widths**
- **Easy to install**
- **Cut to length daily**
- **Various materials available**
- **Mobile roll forming available for long lengths**

Genesis™ Monument® Matt Finish

GENESIS™

ARCHITECTURAL PANELS

Genesis™

Genesis™ is available in single or double seams and can be used for facades or roofing.

With its thin rib and wide tray, it gives a modern appearance using concealed fixing and crimping techniques to lap panels along entire lengths.

The support needs to be ventilated rigid and continuous where all parts of the standing seam panels are laid.

Choose from various materials such as Colorbond®, Zinalume®, Zinc, Copper, Aluminium, Corten and the Uni-Cote® Lux range.

- Original architectural seamed profile
- Single or double seam
- Variable tray widths
- Cut to length daily
- Various materials available

ECLIPSE™
ARCHITECTURAL PANELS

- **Thin, discrete ribs**
- **Variable cover widths**
- **Snap to install**
- **Cut to length daily**
- **Various materials available**
- **Little or no maintenance**

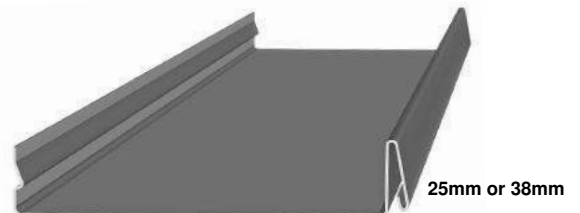

Eclipse™

Eclipse™ is a lightweight cladding system ideal for both roof and walling applications in commercial, industrial and residential environments.

It's thin distinctive ribs and wide pans give it visual appeal. Eclipse™ looks similar to traditional Standing Seam but removes the requirement to manually seam the joints due to the "snapping" process. Available in 25mm and 38mm ribs heights, Eclipse™ can be manufactured in various widths to suit new construction or renovation projects.

The panels are held in place with a concealed fix clip which allows infinite expansion and contraction.

Choose from various materials such as Colorbond®, Zinalume®, Zinc, Copper, Aluminium, Stainless Steel, Corten and the UniCote® Lux range.

285mm - 520mm

Urbane™

ARCHITECTURAL PANELS

UrbanE™ 38 x 265 Monument®

UrbanE™

UrbanE™ can be used for facade or roofing applications. Available in 25mm and 38mm rib height, it comes in various widths and lengths to suit your project.

UrbanE™ has a thin rib and wide tray with a perforated fixing strip along one side.

There is no need for fixing clips and the additional operation of seaming. This ensures the speed and ease of installation whilst allowing for expansion and contraction.

Choose from various materials such as Colorbond®, Zinalume®, Zinc, Copper, Stainless Steel, Aluminium and the Uni-Cote® Lux range.

Expression™ Corten

EXPRESSION™ ARCHITECTURAL PANELS

Expression™ 25 x 250 Woodland Grey®

Expression™

Expression™ is a contemporary wall cladding system installed with a ventilated air gap for external and internal applications. The panels are connected by an interlocking groove giving it an elegant appearance of a recessed joint.

The reveal panel can range from 185mm to 685mm.

Shadow lines can range from 0mm to 25mm.

Expression™ is laid and fixed down on the grooved flange using concealed fasteners directly onto the batten. The panels are connected by inserting the male flange into the groove.

The panels can be laid horizontally, vertically or diagonally. In the case of non vertical walls additional steps must be taken to provide waterproofing for the main structure.

Choose from various materials such as Colorbond®, Zinalume®, Zinc, Copper, Aluminium, Stainless Steel,

- **Wall cladding system**
